AI GOVERNANCE

Human-in-the-loop review

User approval before saving
AI content

CONCLUSION

The system centralized club management successfully

Event management processes were simplified effectively.

Communication between users became more efficient.

AI-assisted features improved content creation efficiency.

FUTURE IMPROVEMENTS

A mobile application can be developed for easier access

Email notifications can be added for important updates

Search and filtering features can be further improved

Analytics dashboards can provide useful insights

AI capabilities can be enhanced for better assistance

THANK YOU!
